OUR PRODUCTS

MCT OIL

Formulation: 1 Drop = 0.5 mg

Recommended Dose: 5 Drops = 2.5 mg

Ingredients: Cannabis Extract, MCT Oil

Equivalent: 350 mg = 1/8 oz

About the MCT Oil Process:

Breakwater uses a unique extraction method consisting of only MCT Oil, water, and ethanol. This process captures active medical compounds from the cannabis while preserving terpenes, creating products that produce synergistic, whole-plant effects. The final extracted product contains only MCT oil and cannabis compounds, both of which are naturally-derived and have an abundance of health benefits!

PREFILLED CARTRIDGE

Recommended Dose: 1-3 second inhale

Inactive Ingredients: Breakwater's in-house cannabis derived essential oil

Active Ingredient: Cannabis Extract

Equivalent: 350 mg = 1/8 oz

Cartridge Type: CCELL Glass Housing & Ceramic Mouthpiece

About the Concentrated Oil Process:

Breakwater uses a unique extraction method consisting of only water and ethanol. This process captures active medicinal compounds from the cannabis while also preserving terpenes, creating products that produce synergistic, whole-plant effects. The final extracted product contains pure cannabis oil from the extraction process and is mixed with Breakwater's in-house cannabis derived essential oils.

CONCENTRATED OIL

Recommended Dose: 0.01mL (1 graduation) = 5-8 mg

Inactive Ingredients: Breakwater's in-house cannabis derived essential oil

Active Ingredient: Cannabis Extract

Equivalent: 350 mg = 1/8 oz

About the Concentrated Oil Process:

Breakwater uses a unique extraction method consisting of only water and ethanol. This process captures active medicinal compounds from the cannabis while also preserving terpenes, creating products that produce synergistic, whole-plant effects. The final extracted product contains pure cannabis oil from the extraction process and is mixed with Breakwater's in-house cannabis derived essential oils.

LOZENGES

Formulation: 1 Lozenge = 5mg

Recommended Dose: approx. 2.5mg = 1/2 Lozenge

Inactive Ingredients: xylitol, isomalt, silicon dioxide, maltodextrin, stevia, mint extract, magnesium stearate

Active Ingredient: THC

Equivalent: 350 mg = 1/8 oz

About the Lozenges:

Breakwater Lozenges are made using the same meticulous extraction method that we use for our MCT Oil and Concentrates. We capture a spectrum of medicinal cannabis compounds that produce synergistic whole-plant effects. Each tin contains 70 5mg lozenges each completely sugar free and flavored using only naturally derived ingredients.

Please avoid driving a vehicle or operating dangerous machinery while taking this product.
